Part B

Student Booklet

1c

Elevens namn och klass/grupp

Instructions – Part B

- Time for the test** 90 minutes for Part B and Part C. You will get both parts at the same time. We recommend that you use no more than 45 minutes for work on Part B. When you have handed in your answers to Part B you may start using digital devices.
- Aids** Allowed aids on Part B are formula sheet and ruler.
- Tasks** This part consists of tasks to be solved without using digital devices. Some of the tasks require working, which is to be shown in the figure and the box next to the task. For the other tasks only the answer is required. The maximum number of points that you can get for your answer/solution is shown after each task.
- Grading limits** The test (Part A–D) gives a total maximum of 88 points.
- Limit for test grade
- E: At least 17 points.
 - D: At least 30 points of which at least 11 points at level C or higher.
 - C: At least 41 points of which at least 21 points at level C or higher.
 - B: At least 55 points of which at least 7 points at level A.
 - A: At least 66 points of which at least 13 points at level A.

Name: _____

Date of birth: _____

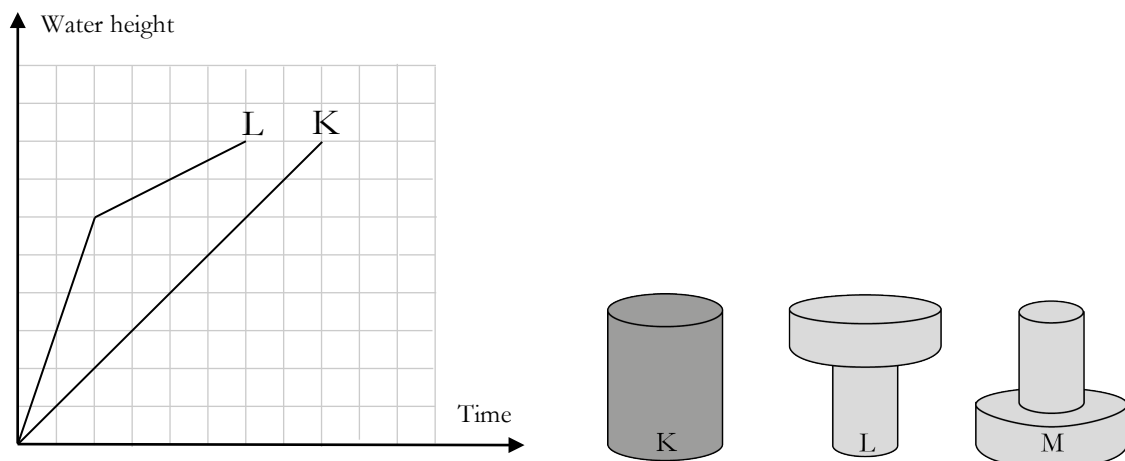

Secondary program: _____ Class: _____

1. What change factor corresponds to a price increase of 40 %? Answer: _____ (1/0/0)

2. Determine $f(0.3)$ when $f(x) = 3x - 0.2$ Answer: _____ (1/0/0)

3. Ali changes SEK 750 into Thai Baht (THB) and gets 3 000 THB. Katarina changes SEK 500 at the same exchange rate. How much does she get? Answer: _____ THB (1/0/0)

4. The containers K, L and M, all with the same height, are filled with water at a constant rate. The graphs show how the height of the water increases for containers K and L.

a) Why does the water rise faster at the start in container L than in container K? Show your reasoning in the box.

(1/0/0)

b) Draw the graph for container M in the coordinate system above. (2/1/0)

5. Leo tosses a coin twice in a row. What is the probability that he, regardless of order, will get exactly one head and one tail?

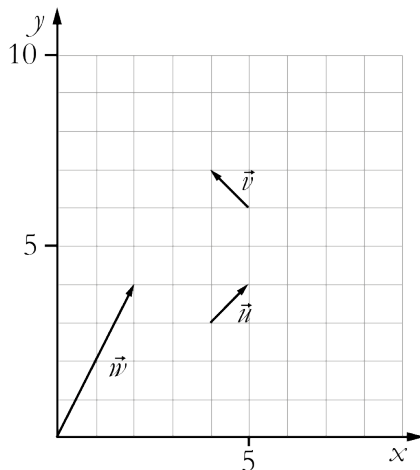

Answer: _____ (0/1/0)

6. Give a possible value of x , written as a decimal, when: $\sqrt[3]{64} < x < \sqrt[3]{125}$

Answer: _____ (0/1/0)

7. Representations of vectors $\vec{u}$, $\vec{v}$ and $\vec{w}$ are shown in the coordinate system.

- a) Write an expression for vector $\vec{w}$ using vectors $\vec{u}$ and $\vec{v}$.

Answer: _____ (0/1/0)

- b) Determine the length (magnitude) of vector $\vec{w}$. Show your solution in the box.

Answer: _____ units (0/2/0)

8. You are to drive a distance of 60 kilometres. What will the time gain in minutes be, if your average speed increases from 90 km/h to 100 km/h? Show your solution in the box.

Answer: _____ min

(1/2/0)

9. A rental car costs SEK 375 per day to rent. For that price you can drive 100 km. If you drive a longer distance, there is an additional cost of SEK 2.50 per km.

- a) Which formula or formulas shown below can describe how the cost K depends on the driven distance x km? Circle your answer/answers.

$$K = 375$$

$$K = 375 + 2.50x$$

$$K = 375 + 2.50x + 100$$

$$K = 375 + 2.50(x - 100)$$

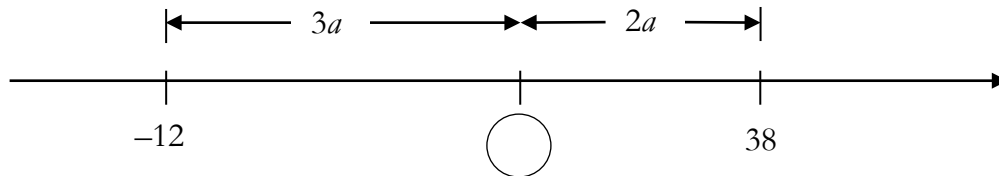

$$K = 475 + 2.50x$$

(0/1/1)

- b) State the definition domain for you choice of formula/formulas. Show your solution in the box.

(0/2/1)

10. Which number should be written in the circle?
Show your solution in the box.

Answer: _____

(0/1/1)

11. Which number or numbers shown below have the same value as the number 23_{10} ? Circle your answer/answers.

1010_2

212_3

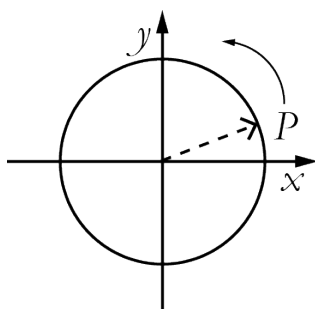

21_5

31_5

32_7

(0/1/1)

12. A circle in a coordinate system has its centre at the origin.
A pointer in the circle is pointing at point P .
 P has the coordinates (a, b) .
The pointer is turned 90° counter clockwise and, now pointing at point S .
What are the coordinates of point S ?

Answer: _____

(0/1/1)

Resultatredovisning – Sammanfattning Elev

Kravgränser

Gräns för provbetyget

E: Minst 17 poäng.

D: Minst 30 poäng varav minst 11 poäng på lägst nivå C.

C: Minst 41 poäng varav minst 21 poäng på lägst nivå C.

B: Minst 55 poäng varav minst 7 poäng på nivå A.

A: Minst 66 poäng varav minst 13 poäng på nivå A.
