. Description of any changes and any decisions taken since the last course.

Description of any changes and any decisions taken since the last course.

A progress of the information in Athena has taken place together with a template of the logbook.

. Strengths of the course according to students.

Strengths of the course according to students.

According to the results of the course evaluation, the students were satisfied or very satisfied as over 85% indicated the numbers 4 and 5 on the quantitative part. According to the free-text answers, the system with a logbook as examination was good.

. Weaknesses of the course according to students.

Weaknesses of the course according to students.

More information on the examination progress was suggested.

. Analysis of the course implementation and results by the course coordinator/equivalent and possibly other teaching staff.

Analysis of the course implementation and results by the course coordinator/equivalent and possibly other teaching staff.

A very good result with that showed that the institutions were doing an excellent job with the students.

. Conclusions and suggestions for possible changes to develop the course for future sessions.

Conclusions and suggestions for possible changes to develop the course for future sessions.

The aim of the course is well met.

. What do you think was good about the course?

What do you think was good about the course?

This course helped me to put in practice what I learned during lectures

The flexibility that one can enroll in the course on short notice if you have a supervisor. Also, if you're in agreement with the supervisor, you could shape what study rate/speeds you want to perform. Another good part is that if one can't come to the traineeship for a week (whether due to sickness or incident), you may have the possibility to contribute remotely (my supervisor tasked me to perform a literature survey or data analysis)

getting hands on experience in the lab and seeing how academic research works

I got to learn how to use a new software and how to analyze video recordings to extract the data. I also got to deepen my knowledge about the study species, since some of the time was invested in going through literature.

. What changes would you suggest?

What changes would you suggest?

I don't think I have any suggestions for that, I really liked the way my supervisor guided me and how the workload was organized.

Nothing I took particular note of.

Mer praktik, mer energi och bättre planering

I would recommend a bit more guidance for what regards the evaluation system, which was from the beginning a bit unclear
