INRÄTTANDE AV STIPENDIUM
FORSKAR/POSTDOKTORNIVÅ
DBB

Projektnamn

Single-cell epigenomics

Typ av stipendium (forskar/postdoc)

Postdoc

Utlysningstext

We are seeking a highly motivated postdoctoral researcher to investigate the molecular mechanisms of brain evolution. This project focuses on how non-coding regulatory elements shape brain development and evolution, and how species-specific changes may contribute to advanced cognitive traits.
Using cutting-edge single-cell and spatial epigenomic approaches, combined with reporter assays and in vitro brain organoid models from human and non-human primates, the postdoc will identify and functionally characterize species-specific
Ansökningar skickas till louise.lehto@dbb.su.se

Stipendietid

2026-07-01 to 2027-06-30

Stipendiebelopp

35,000

Anslag/Finansiering/Kostnadsbärare

31006119

Stipendiet ska utlysas i tre veckor på institutionens hemsida.

Stipendiet inrättas av Stockholms Universitet fastställda reglerna.

Datum: 2026-02-16
