It is difficult to specify the exact time, as it varied daily, but I spent at least 1–2 hours reviewing all materials. I attended all lectures, and in addition, I dedicated several days to thoroughly exploring my chosen topic to ensure I could write the best essay possible.

Comments
I expected the course to be more about law, but it was more politically focused.
It exceeded my expectations
It was a wonderful course

. What was positive about the course?

What was positive about the course?
I genuinely enjoyed almost every aspect of the course — the lecturers' teaching style, the discussions we had, and the thoughtful answers they provided. I also appreciated the activities outside the classroom, like the Swedish game, the pizza session museum and the amusement park visit, as well as the lecture of Swedish minorities, their history.
It was interesting topics that were covered
Good connection to present-day political issues and economic impact.
The professor was incredibly knowledgable and knew everything he was talking about
Good teaching and interesting topic covered very well in the 2 weeks
The Lecturer was very interactive and engaging
We looked at current issues: Trump and the tariffs, but also what it means to apply tariffs.
The fact that the professor was very knowledgeable, which made it very interesting and complete
The course material made it very easy to understand topics and accompanied with the lectures, I felt like I had an in depth understanding.
The lecturer was very engaging and the tropics were interesting! The content could be easily associated with current affairs which made it all the more interesting
This course helps students gain a comprehensive understanding of trade agreements, with a broad perspective that covers historical evolution, country-specific research, and current hot issues. Additionally, it provides ample opportunities for students to express their views.
The extremely knowledgeable and generally great professor in Mr. Pereira and the current events focused teaching
The content, the lecturer, mostly everything

. What could be improved?

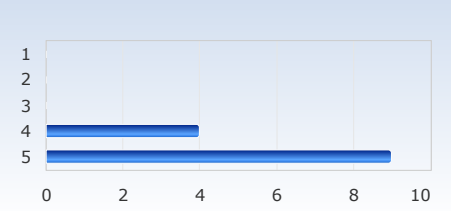

What could be improved?
More structure. It's time to keep up when the teacher just talks freely without powerpoint or something to look at / follow.
The teaching could have included more group discussions or presentations
Having written materials such as slides would be more helpful for non-native English speakers in attending classes. However, the teacher has provided pre-class reading materials which also greatly assist in understanding the course content.
nothing comes to mind right now, the course material and readings were satisfactory

The class could offer more engagement about developing. Countries and Trade
From my point of view, the list of activities could be improved. I understand it's not a camp and adults manage their time independently, but since most people form their own groups, activities that require broader participation can really help bring everyone closer together. I would also suggest considering additional activities outside the classroom that would help deepen our understanding of the subject matter.
Even though the teacher was amazing at just talking to us and explaining everything super well. It would have been nice to either have the transcript of his notes when looking back at the lesson.
I think a presentation for each lecture would be helpful. The lecturer stood in front of the class and just talked at us, which can be hard to follow when we go to a new topic.
The class could be a bit more engaging with presentations and imagery and such
Maybe some kind of material from the lectures eg slide show or something like that so that if you miss a lecture you still get an idea of what was the topic
A visual aid would be helpful

. On a scale of 1 to 5 where 5 is the most positive, how would you rate the following?
